Parcel2U Box — Setup & Usage Guide

Your New Delivery Companion

Receiving letters and parcels when you're not at home. Designed with both convenience and safety in mind, your box offers front and rear access and can be positioned wherever suits you best — outside your home, by the driveway, or anchored into a pathway.

Installation Overview

Important Note: The provided fixings may not suit all wall or ground types. Please ensure you use suitable materials for your property. If installing into the ground, a concrete base is recommended for added stability.

What You'll Need:

- Pencil
- Electric drill (with appropriate bits)
- Spanner or adjustable wrench

Choose Your Spot

Position your box in a location that is:

- Clearly visible for delivery drivers
- Easy for you to access daily
- Sheltered from extreme weather if possible

Popular placements include:

- Beside the front door
- On an external wall
- Bolted securely into a paved or concrete area

Installation Steps

For Wall Installation:

1. Lace the Parcel2U Box flat against the wall.
2. Open the back of the box and mark the fixing holes using a pencil.
3. Move the box aside and drill holes at each marked point to the correct depth.
4. Re-position the box, align the holes, then insert bolts with washers.
5. Tighten everything securely to ensure a firm hold.

For Ground Installation:

1. Open the bottom compartment of the box and place it in your chosen location.
2. Use a pencil to mark the bolt hole positions through the base.
3. Drill into your concrete or slab foundation at each point.
4. Anchor the bolts with washers into the drilled holes, then tighten fully.

Tip: For maximum stability, always install the box into **solid concrete** rather than soft ground or gravel.

How It Works

- The delivery driver opens the top hatch and places your parcel inside.
- Once delivered, the parcel drops into the secure lower compartment.
- You can retrieve it at your convenience — safe, dry, and untouched.

Please remember to include clear delivery instructions when shopping online so couriers know to leave items in your Parcel2U Box.

Safety Reminder

Always take care when handling power tools or drilling into brick, stone, or concrete. Any accidental damage to your property or the Parcel2U Box during installation is not covered by the manufacturer or retailer.
